

UKNFR December 2020 Update

In October, there was an impressive 184 reconstructive flap procedures performed. This represented the highest number of recorded procedures since August 2019. Disappointingly this then fell back to 96 in November and 67 in December. The steady reduction maybe evidence of a resurgence in COVID-19 cases at the start of the second wave. The additional effect of annual 'winter pressure' will be seen over the coming months.
