

A PIONEER EVENT THAT BRINGS TOGETHER THE EXPERTISE OF FACIAL SURGEONS, INJECTORS AND DERMATOLOGISTS TO PROVIDE ADVANCED NON-SURGICAL AESTHETICS EDUCATION

It aims to bridge the gap between surgical and non-surgical approaches and promote the learning of advanced facial anatomy in the aesthetic mainstream. The event is open to registered healthcare professionals, such as doctors, dentists, and nurses, who are already established in the non-surgical aesthetics market. The event is also designed for surgeons and dermatologists who are interested in how non-surgical aesthetics treatments may relate to, integrate with and complement surgical and dermatology practice.

Symposium 1 Orthognathics & Aesthetics
