Aims

A 2 day course for maxillofacial surgeons on orthognathic planning and surgery. By the end of the course, the aim is to have increased confidence in the assessment and planning of patients for orthognathic surgery, orthodontic and surgical considerations for success and have a good understanding of the possible errors in planning and their avoidance.

Teaching format

Lectures

Small group teaching – faculty/participant ratio 1:1

Informal discussion of topics from many perspectives

Organisers

Miss E Woolley, Maxillofacial Surgeon, North Wales
