

TMJ Surgery Post CCT Fellowship - John Radcliffe Oxford

Applications for a 4 month post CCT in TMJ surgery are invited , and we would encourage candidates to consider incorporating this as a rotation with 4 month fellowships at Mersey, Nottingham and Oxford . Successful candidates would be exposed to training with 6 specialist TMJ surgeons and a wide range of allied experts providing a broad basis of experience. Fellows would gain hands on experience with both Biomet and TMJ concepts TMJ replacement systems in addition to level one and level two arthroscopic surgery (with exposure to different arthroscopic systems), open TMJ surgery condylar head and neck fractures and paediatric autologous TMJ reconstruction. Candidates would also be exposed to MDT clinics and non-surgical management would be actively encouraged to undertake audit, prepare publications and attend the EASTMJS and SORG meetings.

Some funding exists for the Nottingham fellowship, funding from existing employers and local trusts is being sought in addition to BAOMS and commercial sponsorship of educational courses for the remainder.

All three units have a track record of providing high quality surgical training and are committed to producing successful future colleagues with the best possible training.

If you are interested and would like to discuss details of what the Oxford fellowship has to offer, please contact Nad Saeed nad.saeed@ouh.nhs.uk or Niall McLeod niall.mcleod@nhs.net
